Looking at the future with our chair	45

Message from Syta Plantinga, founder:

As you will read in this Annual Report elsewhere, we enjoyed the very satisfying year 2018. Donations continued to roll in which made it possible to assist, host and pay the medical journey for over 145 children and young adults.

My heart is touched by the incredible progress the deaf children in our speech-therapy & sign language program have made. Their performance at the annual Rotary Christmas party was one of the most surprising events this year.

I am extremely proud of our Kolewa team. Such a responsible and challenging work can only be done by team members with a great attitude and a heart of gold: their keywords are caring and sharing regardless of the energy it takes. Day by day they show how much they enjoy working in Yayasan Kolewa Harapan Indonesia.

My fellow board members in Bali are of great value. Together we look back critically and optimistically towards the future. An excellent formula for ever better results.

On behalf of our patients and their parents, the entire Kolewa team would like to express their sincere gratitude to all donors, supporters, volunteers, field-partners and the Indonesian Dinas Sosial Kota Denpasar. Together we made it happen and together we will do it again!

Syta Plantinga.

Who we are and what we do...

Yayasan Kolewa Harapan Indonesia

Mission and Vision

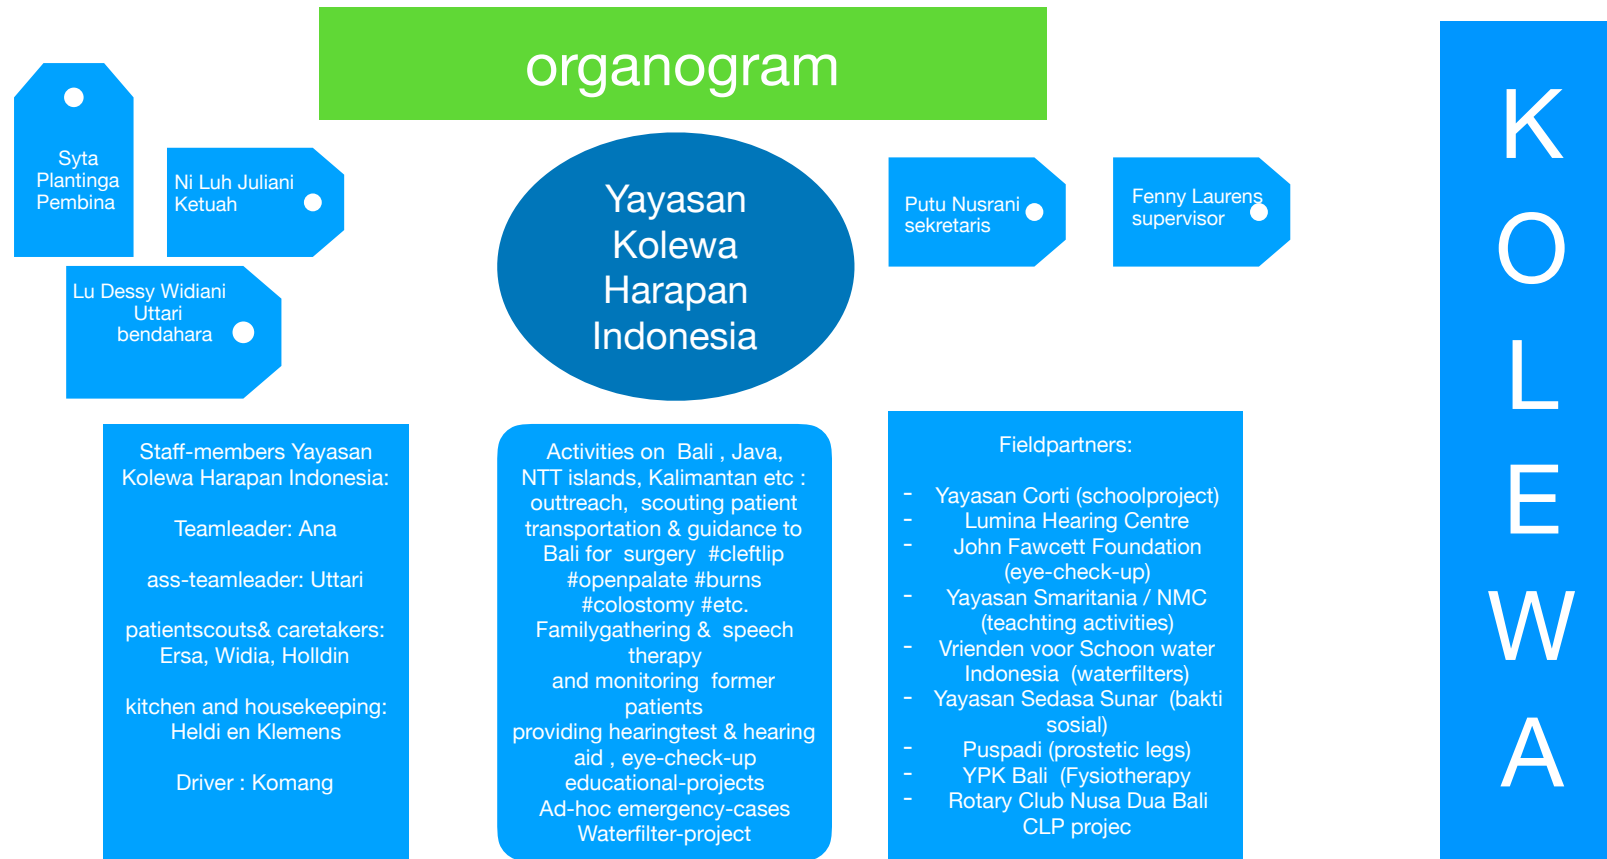

Small and personal: our power is our small size. We are close to the people, personal involvement, using our local contacts and through simple resources, we make significant changes to the lives of families. We go on an “outreach” regularly to many Indonesian islands and Bali to ‘scout’ patients. We work beside our Kolewa-team with local free-lance scouts, give education, advice, organise consultations and make medical treatments possible. Why? Because it is impossible for these families to travel far or to pay for transportation and treatment.

Direct result: We can adapt quickly. We are small of size and close to each other. No long trails and lots of counselling, but we start immediately: we realise the result on short term and in a practical way. We are creative in finding solutions and keep trying until we succeed.

Kolewa wants to set an example to the Indonesian community by informing, motivating, stimulating and supporting and putting forward ideas. With this, a few universal values and rights are leading, such as the rights of the child, right for health and medical treatment. An important focus is their education: not only from the children but also through giving education and information to the parents about (living with) an impairment, personal care and awareness for the environment. It is our goal to raise attention for improvement of health, medical facilities and the concern for children with a physical disability.

Klemens Nitti, housekeeper/ concierge.

Scouting, guiding & hosting 2018

Yayasan Kolewa Harapan Indonesia

Cleft lip & palate surgeries:

Children with cleft lip or an open palate have problems on different levels: eating does not go well, which causes them to be underweight. Frequently they have dental problems which make it harder to speak. A (relatively) easy surgery can give these children the chance to have a healthy and independent life!

We scout potential child patients as well as young-adults and transport them (and their guiding family member) to Bali for surgery and further treatment. Although we were focused on Bali and the Nusa Tenggara islands, also patients from other parts from Indonesia found their way to our Yayasan and asked for help. During treatment, the children and their guardian stay temporary in our shelter Rumah Bicara. The medical staff of the Dharma Yadnya Hospital, driven by plastic surgeon dr. Asmarajaya, focuses on the surgery and hospitalisation. Most children did have a personal sponsor. From July 2018 till the end of the year the procedures for pre-surgery dental care and hospitalisation are financially supported by the Rotary Club Bali Nusa Dua and Yayasan Kolewa was taking care of the costs for transport and shelter.

Our ability to continue providing guidance, care and surgery, free of charge, was dependent on the strong support that we received from donors from Holland and Indonesia. In 2018 they made it possible to offer 108 patients a life-changing medical journey that left our shelter-home with a new smile.

Rumah Bicara. Rumah Bicara is the home base of Yayasan Kolewa, a building with multiple functions. One of the most important things is that we can give shelter to 12 patients guided each by one family member. Also, two of our staff members live permanent in Rumah Bicara. It is also the place where we gather as a team for meetings and welcome many foreign and local visitors to tell them about our charity program and daily activities.

During the week we offer all our temporary inhabitants three meals a day, an activity program, home-schooling and for children with CLP or a hearing problem speech, therapy and sign language lessons.

The team, assisted by interns and volunteers, make sure our patients and parents enjoy their stay with Yayasan Kolewa and try to offer them many opportunities to encourage them and get a new fresh look at their lives.

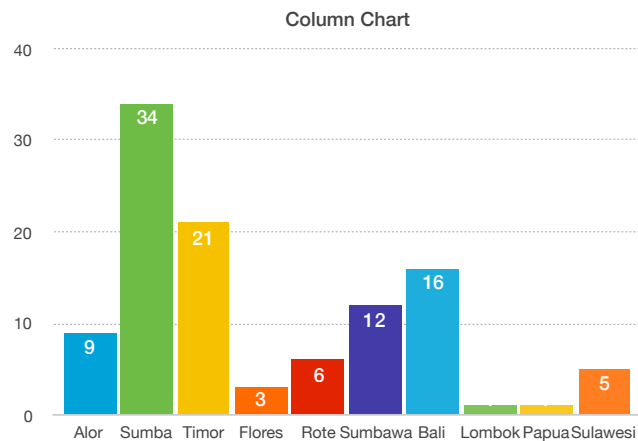

Kolewa Foundation Shelter home and office is based on Jalan Pulau Sebatik 14 in Denpasar.

Always filled with activities : learning and playing at the same time!

Overview CLP children that had surgery in 2018 and stayed in Rumah Bicare, the Kolewa Foundation shelter home in Denpasar.

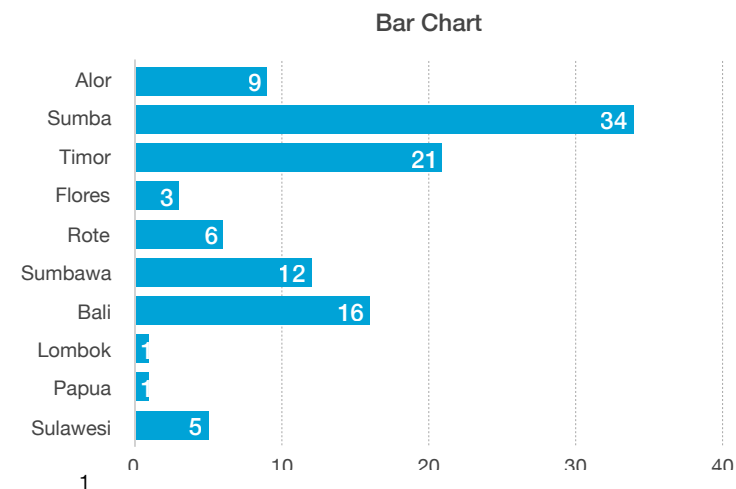

Conclusion:

As you can see the amount of boys is double the amount of female patients.

Number patients cleft lip monitored 60 children	Overview	right side	Left side	middle
boys		40		
girls		20		
boys			22	
girls			12	
boys			9	
girls			4	
boys				9
girls				4

Nusa Tenggara / Nusa Tenggara Barat & others

NTT /NTB	CLP PATIENTS
Alor	9
Sumba	34
Timor	21
Flores	3
Rote	6
Sumbawa	12
Bali	16
Lombok	1
Papua	1
Sulawesi	5

It is also noticeable in the graph that the cleft lip is found on the left side more often than the right side with both genders.

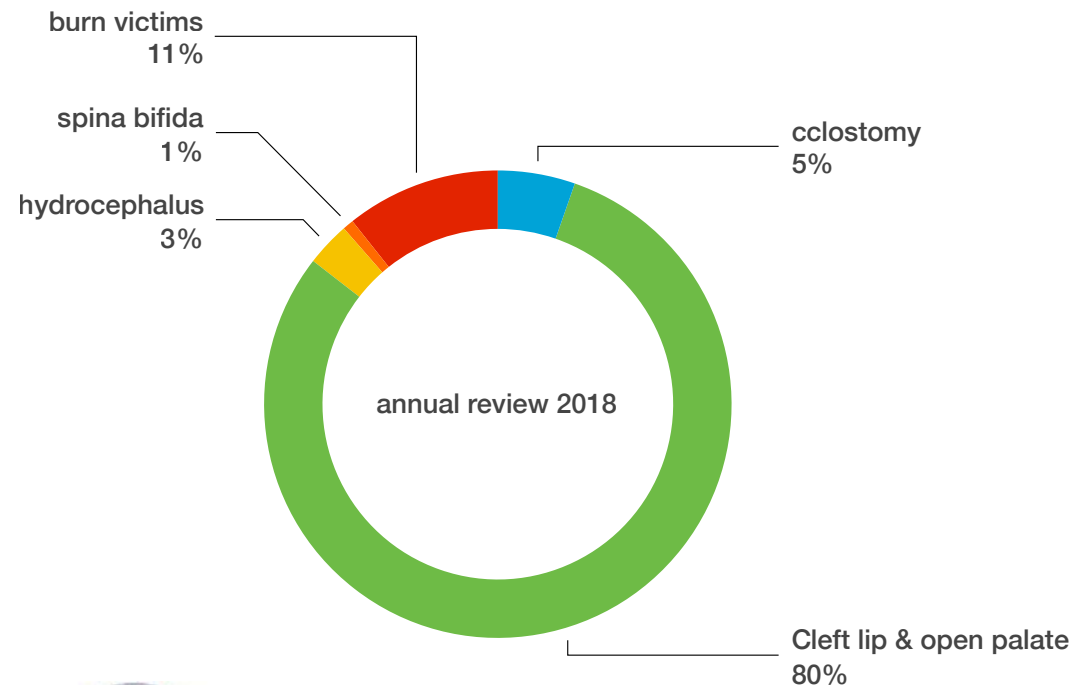

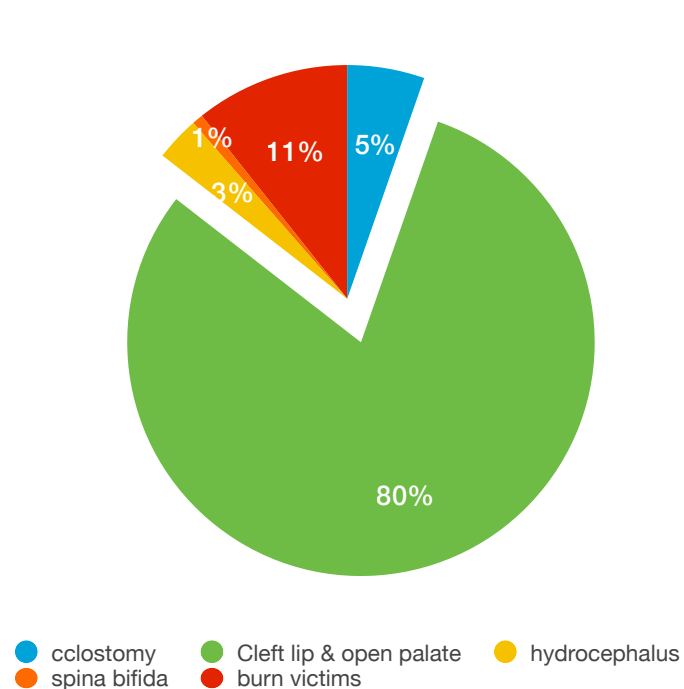

Not only CLP children are offered help by Kolewa. Also other cases are guide by our team during their medical journey. These so-called “long-stayers” are take care of between 3 and 12 months, depending on the illness and treatment by specialists in Sanglah Hospital, Denpasar.

Occupation in our shelter 2018

PROBLEM	AMOUNT PATENTS
cclostomy	7
Cleft lip & open palate	105
hydrocephalus	4
spina bifida	1
burn victims	14
others	2

Pie Chart

Special cases

In some exceptional cases we deviate somewhat from the focus of Yayasan Kolewa Harapan Indonesia. An example is mr. Yeskial from Timor with a severe benign tumor. Him and his wife stayed for 8 months with our foundation, faced several times surgery, but went home to family and their child with a remarkable result.

Raya Melani Kale, a seven year old girl, had a bad start after birth. Her umbilical fracture went into unusual proportions. She was afraid to go to school, felt uncomfortable and ashamed, until our scouts came to visit her family and offered help. Right now she turned into a happy lively girl with hopes and dreams about the future. Years of suffering were solved in ten weeks! Sometimes it is just that simple with a little bit help from outside!

Both patients were treated in Sanglah Hospital Denpasar. We used BPJS insurance, expenses that were not covered by the insurance were paid some dear sponsors from Indonesia.

These are just a few examples we mention in our annual review, there were more similar cases in 2018 end there will be in 2019 for sure.

Our geographic coverage assisted by local scouts and ambassadors of Yayasan Kolewa Harapan Indonesia

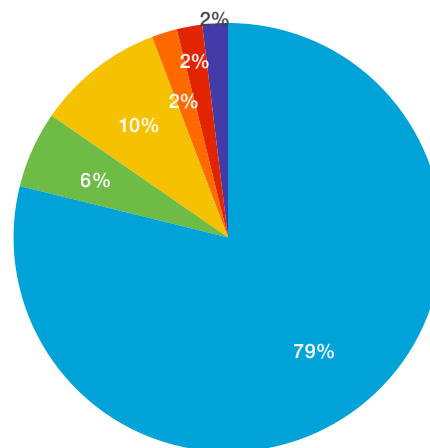

Our service area in 2018 counted over 10 Indonesian islands. On each island, we can rely on our free-lance local scouts and parents from former patients to assist us. Indispensable for the communication with families who don't speak Bahasa Indonesia and very helpful to gain the trust of the local community and governmental offices to arrange the needed paperwork for travelling and surgery. We are very grateful to count Silas (Sumba, Tambolaka), Angie (Sumba, Waingapu), Frans (Rote), Erwin and Nickson (Kupang, Timor), En (Alor), Romy Hidayat (Lombok) as great assistants in our charity-program. To work with field partners as Yayasan We save Dompou, Harapan Sumbawa Project, and DFC (Doctor Children's Fund) Sumbawa Barat is priceless.

Most of our patients are living in remote areas. Finding them is a challenge, bringing to Bali another one. All team members use motorbike, boat, bus, rental car and aeroplane to reach the villages and guide them to Bali. Sometimes even a journey of three days.

Individual visitors in Rumah Bicara 2018	
country visitors	visits
The Netherlands	41
Australia	3
Indonesia	5
Malaysia	1
USA	1
Spain	1

Besides individual visitors we also welcomed groups like the Pikulan Foundation and Imas Training from Holland. A delegation from the Balinese Nitti Mandala Club, Bali Mandara Hospital, Rotary Club Bali Nusa Dua and the Dinas Sosial Kota Denpasar.

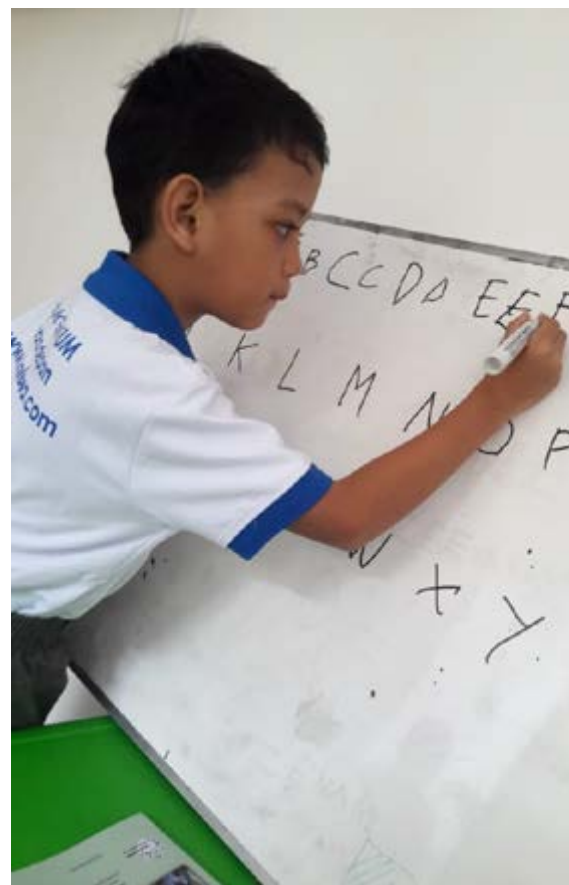

Children with hearing problem

**Yayasan Kolewa
Harapan
Indonesia**

From level zero to real communication

In the Renon area of Denpasar, not far from Rumah Bicara (the Kolewa location), Lumina Hearing Centre is located. With sufficient facilities for testing young children in the form of two soundproofed cabins, this is a convenient address for our patients with a hearing problem. During our outreach activities in Bali, we regularly detect children with a hearing problem. In those cases, we offer help and free hearing test in Denpasar. In 2018 we gave 35 children different types of tests, hearing aids and accessories (used and new devices). Transportation and guidance by our team are taken care of naturally. All expenses on account of Yayasan Kolewa Harapan Indonesia.

Most children and parents that knock on our door are in need of special education. The kids do live an isolated life and don't go to school. If parents do use the possibility of free testing and devices we offer, they agree to let their child take part in our speech therapy and sign language every weekend. Parents also endorse the intention to acquire knowledge themselves and to practice sign language to be able to communicate better with their deaf child.

Speech therapy & sign language by Kolewa team in 2018:

Denpasar: every Saturday and Sunday in Rumah Bicara (12 children), the number had increased last months. During the weekend families with children with a hearing problem can visit the shelter home of Yayasan Kolewa Harapan Indonesia in the afternoon to get free training sign language and speech therapy by our staff.

Karangasem: every Sunday (20 - 25 children and parents) Every Sunday from 10 - 12 am two team-member of Yayasan Kolewa Harapan Indonesia give training. Every two weeks a team of Lumina Hearing Centre join to check hearing aid of the children and teachers of Yayasan Corti lead the practice. New children have an intake and simple first hearing test. Both field partners get paid for their services. We use the location of midwife Nusrani Putu and reimbursed the costs of water, coffee, tea and some snacks for the group.

Buleleng: every 20th of the month (20 - 25 children and parents). In Buleleng we were hosted by field partner Stepping Stones. Unfortunately, the commitment in this area was less than we expected. End November the board of Yayasan Kolewa decided to end this part of the program and advised parents to contact the SLB school Singaraja.

Children, parents and our Yayasan Kolewa Harapan Indonesia team in Rendang, Karangasem on Sunday morning after a successful class speech-therapy and sign language. In 2018 we were able to admit 10 of these kids to our school project in Denpasar. Daily our Kolewa schoolbus is driving them to special education at the Yayasan Corti school. All covered by our foundation: transportation, school fees and uniforms

Speech-therapy in Karangasem

Every Sunday morning for children
and parents.

School project 2018

From the beginning of 2018, eleven children went to the Yayasan Corti school In Denpasar. Ten of them live in Karangasem, the others in the neighbourhood of our Yayasan. The children were initially oriented by the Kolewa Foundation team to be sufficiently prepared to start the special education.

In July 2018, another three students started at this school. Thanks to Kolewa Foundation's Facebook page fundraising, we were able to give four families the good news that their child could join our program. Just in time for the new semester, we were able to complete and pay the registration and measure for the school uniforms. The children joined their classes for the first time at the end of July.

In addition to the support of two Dutch funds, there are also individuals who sponsor a child's school fees. Jesica and Agus are an example of this. School fees were transferred from the Indonesian Mandiri Bank account to Yayasan Corti. The monthly contribution to this field partner is also done online.

In total 15 children enjoyed special education daily. Besides the usual education topics, there is a focus on sign-language and speech-therapy. Special activities like computer-class, dance-class, cooking and swimming are helpful to develop skills and self-confidence.

In December 2018 we were able to order a larger school-bus thanks donations from Dutch and Indonesian companies. The new bus enables us to enlarge the school project, more capacity for the daily travelling from Karangasem to Denpasar and back home!

Family-gatherings

**Yayasan Kolewa
Harapan
Indonesia**

Family gatherings

The first family gathering took place in April in Lovina, Singaraja. Children from all over Bali with a hearing problem came to join, together with their parents. During this two-days event, we invited the parents to attend seminars about education, behaviour problems, healthy food and care for their environment.

For the children we checked their hearing-aid, THT-doctors cleaned their ears and our team gave sign language and speech therapy lessons. Also, brush class and lessons about personal hygiene were given.

The second family gathering was in November in Kupang (Timor) focussing on our former patients with cleft lip, open palate and bone graft surgery. Besides a similar program as in Bali, we checked the children if any further treatment was a need. Some of the children that needed surgery, again travelled afterwards with the team to Bali.

During both events the program contained activities for team building, such as creativity, lampion march, sports and fun games. Learning and playing that is our motto. In the end, all got a certificate of attendance.

Plastic surgery for burn victims

**Yayasan Kolewa
Harapan
Indonesia**

A great relief for victims of a burn accident, plastic surgery in May!

In May, one of our essential and most heavy program components took place. Thanks to a collaboration with field partner John Fawcett Foundation 12 of our patients had plastic surgery by dr. Anom and his international team in the Puri Raharja Hospital in Denpasar. The patients were from Rote, Komodo, Sumba, Timor and Bali. On an earlier stage, they had all been visited by our team to make sure the right paperwork was done. The parents agreed to come to Bali guided and hosted by Yayasan Kolewa Harapan Indonesia. They all arrived in May with one family member in Denpasar.

Because of the need of airconditioned room after surgery, we rented three rooms outside, others were hosted in Rumah Bicara. During the first weeks, after the patients were dismissed from the hospital, they went back on a regular base for wound care. Later on, this was done by Kolewa team member Uttari and volunteer Charles (nurse). End of June still 7 patients stayed with us for wound care and physiotherapy sessions for a few months. The results were very satisfying. Only a few of them need surgery again in 2019. Others can finally live a normal life by using arm or leg in a healthy way after years of being disabled. Interns "social workers" were a valuable addition to the team with so many people to guide.

Together with each other, energetic and full of trust for the surgery to come. All three kids had an awful accident in the past and never got help. Their scars and keloid made normal life impossible. They faced pain, disappointments and shame. The solutions offered by Yayasan Kolewa Harapan Indonesia for Haldi, Daud and Jeni ,were a gift they could only dream of for many years.

Outreach Bali

Yayasan Kolewa Harapan Indonesia

Outreach activities:

Regular our team went upcountry to visit families in remote areas. The primary goal is to distribute the Tulip water filter system. In 2018 we gave over 250 houses and their inhabitants the possibility to filter water from their well, stored rainwater or water from the river, into trustable drink water.

A side effect from these home visits is that we can monitor health problems. We donated several walkers, wheelchairs and medication there where needed. Medical intern dr. Henk Schoemaker joined our activities for 2 months. Travelling through Bali, Timor and Sumba he advised our staff and reassured people to go and see a local doctor or that there were no health issues that needed treatment at all.

Another part of our outreach is our collaboration with Yayasan Sedasa Sunar. We joined three times their "Baksos". Using the classrooms of a public school in the poor areas of

Karangasem and Buleleng, the population of six surrounding villages were invited for a medical check-up. The Kolewa team makes sure that all schoolchildren don't get bored while waiting. We gave seminars about healthy life, arranged creativity activities and support the organising party with a donation of 5.000.000 Indonesian Roepiah. Our counterpart in Holland collected used glasses, hearing-aid and other medical aid, which we donated to the local Puskesmas.

On demand of the local government we occasionally joined twice an event, organised by the Dinas Sosial. Once to support elderly priests with a goody-bag that contained food items. The other time board members Putu and Uttari distributed medication to those who got a prescription from the participating doctors but had no money to buy the things themselves.

Wherever we can help, we will.

Supporting victim of natural disasters :

The island of Lombok faced a terrible disaster in August 2018. Our local scout in the area of Mataram updated us frequently about the situation. After sending some donations for stationary for school-kids, our team visited Lombok in December 2018 to learn more about the current activities regarding rebuilding schools and houses. Confronted with many problems, we decided to accept one project for 2019: rebuilding a "kindergarten" thanks to sponsor Stichting Pikulan from Holland.

During the first semester of 2018, the team of Yayasan Kolewa Harapan Indonesia weekly offered support to the evacuees of the Mount Agung. Due to eruption dangers of this volcano, many families stayed in shelters with lack of food, personal care items, water and plastic covers to protect them in the rain season. In the case of health problems, we arranged treatment and medication. Besides we distributed water filters and gave budget to build sanitary solutions.

Field partners in Bali

**Yayasan Kolewa
Harapan
Indonesia**

Joined hands:

Working together, sharing knowledge and experiences is indispensable. In 2018 we joined on a regular base with field partners in Bali to get the most successful results during the healing journey of a child or young adult.

The John Fawcett Foundation was our partner during the plastic surgery marathon for burn patients. But also frequently we guided people with eye problems to their consultation hours in Sanur on Wednesday.

In Anika Linden Centre we have a good relationship with foundations as Yayasan Puspadi Bali and Yayasan Peduli Kemanusiaan (YPK)

They provided our clubfoot children with special shoes and braces. Our burn patients, children with hydrocephalus and burns, got physiotherapy after surgery for free.

In return, we donated used walkers, wheelchairs and sticks to them.

In Buleleng partner Steppingstones Bali offered us their accommodation to enable us to give speech therapy and sign language lessons to deaf and badhearing children in that neighbourhood once a month.

36 Hari Menunggu

Pengungsi di Segah Dapat Bantuan MCK

Amlapura (Bali Post) -

Warga asal Banjar Batumadeg, Desa Besakih, yang mengungsi di tempat pengalangan padi di Banjar Segah, Desa Nongan, Rendang, Karangasem, sedikit lega. Setelah menunggu selama 36 hari, mereka akhirnya mendapat bantuan MCK dari Yayasan Kolewa Harapan Indonesia Denpasar. Bantuan itu disambut gembira oleh pengungsi karena tak perlu lagi jauh-jauh ke teluk atau sungai untuk MCK.

Pembangunan tempat MCK tersebut tidak mencari tukang. Pengerjaannya dilakukan oleh warga pengungsi secara swadaya dibantu sejumlah TNI dari Koramil Rendang. Mereka sangat bersemangat membangun

MCK, tak peduli panas terik matahari.

Koordinator pengungsi di pengalangan padi di Banjar Segah, I Nyoman Sumerta, mengungkapkan banyak terima kasih kepada donatur yang telah memberikan bantuan MCK. MCK sangat dibutuhkan mengingat selama 26 hari atau sejak 22 September lalu, pengungsi dari 21 KK dengan jumlah 70 jiwa sangat kesulitan BAB dan mandi. "Kami sangat berharap bantuan MCK ini dan sekarang sudah terwujud," ungkap guru olahraga di

SDN 6 Besakih itu, Minggu (29/10) kemarin.

Bahan-bahan pembangunan MCK mulai dari beton penyangga, semen, ciwet, pipa dan batok berasal dari sumbangan yayasan. Bantuan besi datang dari Koramil Rendang, sedangkan yang lainnya dari donatur.

Salah satu pengungsi wanita, Aryaningsing, mengatakan sangat bersyukur ada bantuan MCK. Bantuan ini sangat membantu pengungsi yang selama sering kebingungan dan kesulitan ketika mau BAB. "Kalau sakit

perut di malam hari saya sangat kosal karena harus ke teluk di bawah kegelapan, terang itu satu anak ini.

Menurut anggota Koramil Rendang Serma I Nyoman Santana, sebetulnya bantuan MCK ini diberikan kepada pengungsi yang berada di kandang ayam di Desa Pesahan. Namun, karena pemilik lahan di tempat tersebut tidak mengizinkan pembangunan MCK, makanya bantuan kemudian dialihkan. "Kebetulan di sini (pengalangan padi - red) tidak ada MCK," ucapnya. (kmb41)

RUCIKA
SALAM BANGSA MELAKUKAN BANGSA BANGSA

Bali TV broadcasted 20 minutes lasting documentary about Yayasan Kolewa Harapan Indonesia which is published on YouTube

Daily we posted our activities on our Kolewa Foundation Facebook Page in English and on the Yayasan Kolewa Harapan Page in Bahasa Indonesia.

On our website, we wrote blogs and general information about our charity program.

Donations and financial review:

Yayasan Kolewa Harapan Indonesia

Donations 2018

During the year 2018, we received, per semester, support from our counterpart Stichting Kolewa in Holland. These donations raised through fundraising activities in the Netherlands enabled us to continue our charity program as published in our policy 2018. The additional funds from Indonesian donators covered the unforeseen expenses and overhead, tax & office costs. Stichting Kolewa Holland handed over the property, purchased in 2014 and 2016. Our Yayasan took over all contracts and belongings in the beginning of the year, with a value as here under shown.

Looking to the future with our chair!

Yayasan Kolewa Harapan Indonesia

Goodbye to a fantastic year, hello to a new year to come :

After a year full of activities, we are heading to a new year full of challenges, however, our confidence and trust in your support are great.

Of course, we continue our daily programs concerning children born with an operable condition. Together with dedicated sponsors and our valuable partnership with Rotary Club Bali Nusa Dua, we will make sure, that hopeless children in Indonesia get the medical assistance they need.

We do hope to enlarge our school project in 2019 with three to five deaf or bad hearing children. It is our goal to in total give 20 children access to special education where they learn to communicate with sign language.

Plastic surgery for children and young adults who were a victim of severe burn accidents will be something wherefore will actively raise funds. Together with field partner John Fawcett Foundation, we do work on a surgery marathon of 5 days in Denpasar.

We are excited to start a new project in Lombok. To be able to give children a new place for education, after they lost everything due to the earthquake, is an unexpected honour given to us by the Dutch Pikulan Foundation. We will fulfil our assignment with enthusiasm and precision.

Four-hundred water filters will find their way to remote areas in Indonesia, which means: if we get your support! Giving access to clean drink water is one of the essential topics in life.

An excellent and involved team can only do all mentioned above. That's what we are, one by one the Koleywa team members were terrific last year and will again fulfil their job active and enthusiast in 2019.

Ni Luh Juliani, chair.

A close-up photograph of a young girl with dark hair and eyes, wearing a light green shirt. She is holding a doll that is wearing a bright yellow knitted hat with colorful stripes and a matching colorful knitted outfit. The background is blurred, showing other people. A semi-transparent green rectangular box is overlaid on the right side of the image, containing text.

Our projects in 2019 will be as
colourful as this little girl!

**Yayasan Kolewa
Harapan
Indonesia**

The best start ever...

A new schoolbus arrived! In January 2019, thanks to the donation of AFAS Foundation, we were able to start using this beautiful Toyota Hi-Ace bus. It enables us to bring daily over 15 deaf and bad-hearing children from Karangasem to Denpasar for special education. By using the link below, you can watch the first schoolday 2019, when driver Komang is picking up the kids from school. <https://youtu.be/Dp6hufsCzFE>

Bali TV broadcasted lately the interview with our chair and parents of some of our Kolewa-kids. It is worthwhile to have a look yourself by using this link: <https://youtu.be/NMQhfBv3IFk>

In Kupang our team distributed in January more than 25 Tulip waterfilters to low-income families who don't have acces to clean drink water. On YouTube you will find an impression of our team, explaining the whole proces of filtering water. https://youtu.be/BLE_eXYqrqM
