Review Fourteen Kolewa School Kids

Fourteen Kids Going to School Thanks to You!

Dear sponsors,

Lately, we received a significant donation from you, which made it possible to help 14 children with a hearing problem in Bali to get access to special education. With your support, we were able to pay their school fees, uniforms, transportation, study tour, and some extra cost.

Fourteen children were heading to a new future with a smile. They can go to school without being bullied, parents do not feel ashamed anymore and can become part of the community again after being abandoned and isolated. Together we made it happen, but we could never have done it without your support.

In this review, we show you the result per child. Considering the privacy of the family, we only can give you the name, age, and where they come from and improvement at school in knowledge and socialization. Of course, we added some pictures to show you the result after their study in this semester.
